Notes:

- 1) The average/median SAT scores listed above are obtained from various latest sources (school websites, *Princeton Review*, the College Board, etc).
- 2) Some of the SAT scores are based on the predicted ranges (plus or minus 10 points) because the schools/institutions didn't release the data available to public.
- 3) From the *U.S. News and World Report: America's Best Colleges 2007*.
- 4) The only college ranked in top 10 and is not here is Caltech (California Institute of Technology = 4<sup>th</sup> national rank), but since not that many people apply to Caltech each year, it's less significant to stress its admissions data.
