

MBerry Permission Form

Dear Parent or Guardian,

As part of the “Chemistry in Our Lives” HSSP class at MIT, we wish to try the “MBerry Tablets” as a demonstration to explain how taste buds work on March 23rd, 2019. The demonstration involves eating chewing an MBerry tablet, followed by eating lemon and Granny Smith apple slices.

MBerry Tablets are 100% safe and natural (see myberry.com for complete details) and can be purchased from Amazon. They are made up of corn starch and an enzyme extracted from an edible fruit. The demonstration is a fun, hands-on activity that helps drive home the lesson of how we can taste different types of molecules (sour/bitter/salty).

If you have any questions or concerns, please feel free to reach out to us.

Sincerely,

Merjema Purak and Hayden Carder

I give my child, _____ (*child's name*) permission to participate in the MBerry Demonstration.
